MESSAGES FROM COMMUNITY MEMBER

Liberia: "The community's previous water source wasn't safe for drinking and they had to walk far distances just to fetch water for drinking. Some community members were fetching water from a nearby creek for cooking and washing. Thank God for (Igo Oil Field Service) in a special way for connecting the community with this clean cup of water in Jesus' name. Members of the community will never go far places for water and both adults and children will stay healthy."

Uganda: "I will use the water from the well to enhance my tomato garden. The water source is not only going to relieve us of the long distance to the stream, but the challenge of unknown water borne diseases will be gone. We shall also begin to irrigate our vegetable gardens around the borehole, this should increase our earnings."
